Ivanti Service Manager
Project Portfolio Management Easy's

ivanti

Strategic decision-making on the entire portfolio

Beside Service Management, main challenges are to view, track and manage all current initiatives and projects. As capacities are limited, you need to select the right projects for the right requirements. Resources and budget must be considered for all teams and all types of activities.

"Easy's Project Portfolio Management" (ESPPM) helps you leverage the assignment of your key resources, and identify when project schedules and resources are compatible. Efforts optimization for each project requires a global visualization allowing to allocate the resources, follow the costs and make the necessary adjustments in order to better manage the risks.

ESPPM provides integrated features for managing projects and portfolios through IT as well as other parts of your business.

Fully integrated with Ivanti Service Manager management, the ESPPM module is very adaptable to your needs.

Better understanding and reporting

Gantt chart, phase views for projects, tasks, status, calendar and intuitive dashboards provide a better management of efforts and resources allocation through your portfolio.

A project document repository and collaboration features are also available to help employees share updates and make the project lifecycle process more efficient.

In addition, ESPPM offers issue and risk management capabilities, including escalation workflows on current projects.

ESPPM enables decision-makers to highlight, manage and mitigate risks on critical projects and portfolios.

KEY FUNCTIONS

- Identify, manage and mitigate project risks
- Monitor projects and portfolios allocations and budget
- Manage projects activities and resources from start of implementation

KEY BENEFITS

- Balancing risks in all projects
- Allocate resources to projects aligned with strategic objectives
